

RADIO REMOTE PUMP CONTROL PENDANT

> RADIO PENDANT

DIMENSIONS L x W x D

TRANSMITTER	RECEIVER
160mm x 65mm x 35mm	80mm x 130mm x 30mm

Radio Telemetry Pendant for Pump

Fail safe design ensures pump will shut off if there is no signal (out of range) or if battery is flat.

Waterproof transmitter and receiver housings.

Range up to 100m (line of sight).

Batteries easily replaced without exposing electronic circuitry.

Frequency hopping technology (eliminates interference problems).

All solid state components.

Start, Stop, Forward, Reverse, Speed Up and Slow Down buttons.

Can be programmed for additional functions.

Transmitter

- Robust machined housing O ring sealed for maximum water protection.
- Independent start and stop buttons ensure correction selection is made at all times.
- Inbuilt super-magnet to attach to barrel hoops and cat walks.
- Stainless steel hook.
- 2 x AA batteries for long service life.
- Easy battery access.
- 30 minute sleep function to protect battery life.
- Waterproof foil keypad.
- IP67.

Receiver

- Solid State design encapsulated in epoxy resin.
- IP67.
- Relay outputs 5 amp for Run, Direction, Speed Up and Slow Down.
- Flying leads 600mm long.
- Easily mounted via two screw holes.

There is a better way
